Science. Solution.

A trusted research partner

PROVIDING RESEARCH AND DEVELOPMENT EXPERTISE

Hyperion Biotechnology, Inc. has been providing biomedical research and support services to the Department of Defense (DoD) and other government agencies since 1998. We have the resources and personnel to execute a wide variety of scientific programs. Our research staff and hiring capabilities include Ph.D. level scientists, subject matter experts, program managers, highly skilled laboratory personnel, and animal technicians across the U.S.

Hyperion is a particularly valued government partner because of our small business qualifications:

- **8(a)**
- **8(m) Economically Disadvantaged Woman-Owned Small Business (EDWOSB)**
- **Service-Disabled Veteran-Owned Small Business (SDVOSB)**

A value-added teammate

UNITING LARGE AND SMALL BUSINESSES TO DELIVER HIGH QUALITY SOLUTIONS

Hyperion has experience as a prime contractor and as a subcontractor to large corporations. We can move quickly and efficiently to produce proposal documents. In order to offer the government customer the most effective solution, we are capable of serving as a small business prime contractor or developing teaming arrangements that best meet the customers' needs.

Hyperion is headquartered in San Antonio, Texas, which is a leading military center for research and medical training. We understand the military research environment and maintain a network of military and business contacts. Our scientific staffing capabilities and relevant past performance make us a good partner for government research and support contracts.

An experienced government contractor

Hyperion provides technical support and program management for a wide variety of DoD research efforts. We have experience responding to Requests for Proposals as well as developing innovative ideas for Broad Agency Announcements and other funding opportunities. We have a demonstrable record of success.

Our key clients include the following:

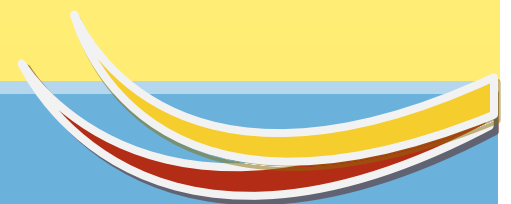

- U.S. Air Force
- U.S. Army
- U.S. Navy

RESEARCH SUPPORT SOLUTIONS

- BIOMEDICAL RESEARCH SUPPORT
- SCIENTIFIC PERSONNEL STAFFING
- ANIMAL RESEARCH SUPPORT
- MEDICAL SUPPORT STAFFING
- PROGRAM MANAGEMENT
- CONTRACT MANAGEMENT

SCIENTIFIC SOLUTIONS

- BIOMARKER DISCOVERY
- HYPERBARIC OXYGEN THERAPY
- HUMAN PERFORMANCE
- WOUND HEALING
- TRAUMATIC BRAIN INJURY
- COMBAT CASUALTY
- AEROMEDICAL EVACUATION
- MEDICAL DEVICE EVALUATION
- INFECTIOUS DISEASES
- BIODEFENSE
- HUMAN CLINICAL STUDIES
- ANIMAL MODELS
- BIOINFORMATICS
- CUSTOM EXPERIMENTAL DESIGN

SELECTED PAST PERFORMANCE

U.S. Air Force

- **School of Aerospace Medicine:** ID/IQ contract to perform biomedical research
 - 22 task orders have been awarded to Hyperion since 2006. Research includes human performance biomarkers, antiviral therapeutics, Ricin toxin, Traumatic Brain Injury (TBI), deployment-related microorganisms, and nanoparticulates.
- **Air Force Research Laboratory/711th Human Performance Wing:** Subcontract to provide scientific research staffing at Wright-Patterson Air Force Base
- **Special Operations Command**
- **Air Combat Command**
- **311th Human Systems Wing**
- **Air Force Surgeon General**
- **Force Protection Battle Laboratory**

U.S. Army

- **Medical Research Institute of Infectious Diseases (USAMRIID):** Veterinary support services; lab animal care
- **Institute of Surgical Research (USAISR):** Tissue regeneration research personnel; animal surgical research
- **STTR Program:** Discovery of physical and cognitive performance biomarkers
- **Medical Research and Materiel Command**
- **Walter Reed Army Medical Center**

U.S. Navy

- **Bureau of Medicine and Surgery (BUMED):** Omnibus 2 ID/IQ contract
 - 9 delivery orders have been awarded to Hyperion to provide clinical research support for the Naval Health Research Center San Diego, bioinformatics support for the Naval Medical Research Center Silver Spring, and logistics and program management for the Defense Center of Excellence for Psychological Health and Traumatic Brain Injury.
- **SeaPort-e**

DTRA

- Development of novel therapeutic agents for toxins and emerging infectious diseases
